Code

Destination.cs

```
using UnityEngine;
```

```
[System.Serializable]
```

```
public class Destination
```

```
{
```

```
    public string name; // Destination name
```

```
    public string description; // Destination description
```

```
}
```

Example Data

```
void Start()
```

```
{
```

```
    destinations.Add(new Destination
```

```
{
```

```
        name = "Paris",
        description = "The city of light and love."
    });
    destinations.Add(new Destination
    {
        name = "Tokyo",
        description = "A bustling metropolis with rich culture."
    });
    destinations.Add(new Destination
    {
        name = "New York",
        description = "The city that never sleeps."
    });

    PopulateDropdown();
}
```
